\* The distributions go to a reserve account and then the Board decides the distribution from that account in order to minimize fluctuations.

\*\* Montana also deposited \$4.6 million in the Technology Acquisition and Depreciation Fund from timber sales, plus \$4 million in revenue went to the trust administration account, \$54,466 to the commercial leasing account, \$97,964 to the recreational use account and \$1 million to the resource development account. An additional \$13.1 million went to repay the coal loan to education.
